Professional Summary

Results-driven Java Full Stack Developer with proven experience in Spring Boot, Microservices, REST APIs, JPA/Hibernate, Spring Security, PostgreSQL, MongoDB, React.js, Kafka, and Docker. Built an AI-powered self-healing platform leveraging ML anomaly detection, LLM-driven auto-recovery, and event-driven architecture, reducing manual incident intervention to zero. Delivered 20+ production features across two internships using JWT/RBAC security, Swagger/OpenAPI documentation, and Agile/Scrum practices. AWS Cloud Architect certified. CGPA 8.69. Seeking entry-level Java Developer or Full Stack Developer roles.

Technical Skills

Languages: Java (Core Java 8+, OOP, Collections, Multithreading), JavaScript (ES6+), TypeScript (basics), Python, C++
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Cloud, REST APIs, Microservices
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive & Mobile-first UI Design
Databases: PostgreSQL, MongoDB, MySQL, SQL, ORM (JPA/Hibernate)
DevOps/Cloud: Docker, Docker Compose, AWS (EC2, S3, CloudWatch, IAM), GitHub Actions (CI/CD), Git, Maven
API & QA: Kafka, Swagger/OpenAPI 3.0, Postman, JUnit 5, Mockito, JWT, RBAC
Concepts: Event-Driven Architecture, LLM/GenAI Integration, ML Anomaly Detection, SOLID Principles, Agile/Scrum, TDD

Experience

Full Stack Java Developer Intern Dec 2025 – Jun 2026
Code Crafter Services, Kolhapur *On-site*

- Engineered 12+ production REST APIs with Spring Boot, JWT authentication, and RBAC, securing 3 user-role endpoint groups across 5+ backend microservices
- Integrated PostgreSQL and MongoDB using Spring Data JPA + Hibernate ORM with optimized query strategies, managing data across all backend services
- Delivered 8+ full-stack features in bi-weekly Agile sprints; documented all endpoints via Swagger/OpenAPI 3.0; collaborated with React team on REST contract design

Web Developer Intern Jul 2024 – Aug 2024
Onestar Software Solutions, Sangli *On-site*

- Built 10+ responsive React.js UI components using mobile-first design across 3 product pages; reduced design-to-code turnaround by 30% through reusable component architecture

Projects

AI-Powered Self-Healing E-Commerce Platform - GitHub *Mar 2026 – Present*
Java · Spring Boot · Kafka · Redis · Docker · PostgreSQL · Python (ML) · LLM APIs · Microservices

- Architected 4-service event-driven microservices backend with Kafka real-time log streaming; integrated ML anomaly detection with 3-tier severity-based auto-recovery, reducing manual intervention to zero.
- Built LLM-driven decision engine for automated remediation (AI root-cause analysis, Docker container auto-restart, admin alerting) — estimated 90% MTTR reduction.
- Containerised all services with Docker Compose; achieved 80%+ unit test coverage with JUnit 5 + Mockito; full API documentation via Swagger/OpenAPI 3.0

SkillEngine – Skill Gap & Learning Path Platform - Live Demo *Aug 2026*
Java · Spring Boot · CognoDB · Graph Database · AngularJS · REST API

- Developed a graph-based skill-gap analysis platform using Spring Boot and CognoDB Cloud, modeling 120+ skills, prerequisites, and career paths to generate personalized learning sequences through graph traversal.
- Designed REST APIs for skill discovery, prerequisite analysis, career-path mapping, and learning-path generation using a graph database architecture.

Jewelry Shop E-Commerce Website - Website *Mar 2026*
React.js · Tailwind CSS · JavaScript (ES6+) · REST API Integration · Responsive Design

- Responsive React.js storefront with Tailwind CSS; centralized product data layer enabling non-technical content updates without code changes

Education

B.Tech in Computer Science Engineering *2023 – 2026*
ADCET, Ashta, Sangli *CGPA: 8.69 / 10*
Diploma in Information Technology *2020 – 2023*
SIT Polytechnic, Yadrav, Ichalkaranji *82.69%*

Certifications

AWS Academy Cloud Architecting — Amazon Web Services (AWS Academy)
Java (Core + OOP) — DataCamp Cloud Computing Elite — NPTEL (IIT-level)
